Self-leveling system
without having to
disconnect a thing

Stand is lightweight for
easy backpacking

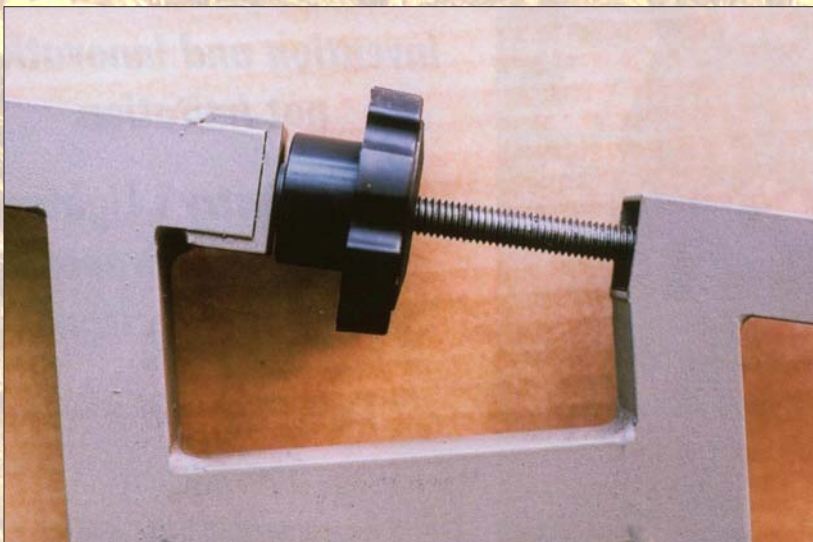

Just Turn the Knob

The self-leveling system provides you with 7.5" of adjustment and comes standard with every model (except The Classic)

The Rumor is True

*Yes, you can make leveling adjustments safely with a **TIMBERTALL** without having to disconnect a thing, even while you're in it. Here's how!*

Self-Leveling System

WARNING: FAILURE TO FOLLOW ALL WARNINGS LISTED COULD RESULT IN SERIOUS INJURY OR DEATH. Not to be used without a Full Body Harness (Fall Arrest System). Read instructions before use! Do NOT modify this product in any way. Proper maintenance and inspection is required!

Man adjusting the self-leveling system. Note: Turning the knob clockwise will raise the platform and climber, and counterclockwise will lower the platform and climber.

BRUTE LITE

- All welded aluminum construction
- Safety you can count on
- Only seconds to set up and take down, even in darkness!
- User friendly (no tools required)
- Environmentally friendly (will not damage trees!)
- Lightweight, easy backpacking, even in the tightest spots, approximately 14.5 lbs.
- Standard sling seat and padded backrest, for all-day hunting comfort
- Heavy duty backpack strap with "Quick-Release" included
- 300 lb. weight capacity
- Certified Fall Arrest System included

WARNING: FAILURE TO FOLLOW ALL WARNINGS LISTED COULD RESULT IN SERIOUS INJURY OR DEATH. Not to be used without a Full Body Harness (Fall Arrest System). Read instructions before use! Do NOT modify this product in any way. Proper maintenance and inspection is required!

- Built-in armrest
- Easy installation of aftermarket accessories
- Lifetime warranty on aluminum frame and cable system
- Platform size is 18¼" x 29"
- Climber/seat size is 21" x 29"
- Fits 8" to 22" tree diameter
- Platform frame fits inside climber frame model
- Designed for a small to extra large person (up to 42" waist)

TIMBERTALL LEGEND LITE

Design is reversed from Brute Lite to allow climber to fit inside platform for easier set up and takedown. Please Note: This model will accommodate those only with a waist size of 34" or less. Total weight approximately 14.5 lbs. Fits 8" to 22" tree diameter
21" x 29" platform
19" x 29" climber/seat size

- Weighs approximately 13 lbs.
- Platform size is 18" x 27"
- Climber size is 20³/₄" x 27"
- 275 lb. capacity

A top-quality treestand at a much lower price

TIMBERTALL

TREESTANDS

TIMBERTALL TREESTANDS Factory Accessories

GUNREST

Gunrest is easily attachable and detachable and weighs only ounces. Notice: ability to push and pull on rest allows user to raise or lower barrel height quietly without losing sight contact with target.

FOOTREST

Footrest is easily attachable and detachable. Used to raise feet making user more comfortable while in seated position. Folds flat for more compact backpacking.

GUNHOLDERS

Weighing only ounces, and seconds to attach, gun can remain in gunholder while climbing but keeps gun within arms reach while in seated position. Also great for hanging bow on while climbing.

BOOT STRAPS

Boot straps are used in rare cases providing users footwear is too large to insert through side rails of the platform.

BOWHOLDER

Weighing only ounces, and seconds to attach, bowholder is fully adjustable and keeps bow within arms reach.

ACCESSORY PACK

Accessory Pack attaches easily with Velcro strapping. Pack wraps around the climber frame, has a double pull zipper with mesh compartments for easy storage. Works well for keeping all of the user's equipment organized and at your fingertips.

PADDED SEAT

Weighing only ounces, padded seat attaches quickly and easily by inserting center seat strap through loop in each end of padded seat. This will provide a great amount of comfort to standard sling seat.

Ask these people what they think of **TIMBERTALL**

The biggest challenge is getting set up without making noise and spooking the deer out the other side of the bush or the hollow. **TimberTall Treestands** allowed me to take this 13 point 130 class P&Y buck without standing for the shot at 15 yards. It is the simplicity, quietness, and the mobility of a **TimberTall** tree stand that made this possible. Thank you **TimberTall** for making a dream come true.

Thank You
Chris Feese

Through the years, I have purchased a number of stands, finding them either too heavy to carry any distance, noisy while using, complicated to assemble, or the feeling of not being safe, especially at 6'2", 280 lbs.

My **TimberTall** tree stand got me the biggest opportunity to shoot the largest buck of my life: a 10 pointer with a 21 inch spread. A 146 B.C. had seen his last day. If I had not been in a **TimberTall** tree stand, I sincerely believe that I would not have had the opportunity to bag this trophy animal. I owe my success to the quiet simplicity and mobility that characterizes your stand.

Sincerely
Ron Kemberling

Thanks to **TimberTall** for producing a stand in which a 6'6", 240 pound man can utilize with comfort for hours. The self-adjusting feature makes it easy to level once in place.

I would like to thank you for providing me the opportunity to harvest this 142 class B.C., 9 pointer, which allowed me a 15 yard shot from my **TimberTall Super Brute** tree stand.

Thank You
Bruce Gray
Highstown, NJ

The **TimberTall** tree stand gave me the versatility and mobility to move eight times with the buck close, before getting the opportunity to harvest the biggest buck I have ever taken.

Utility Cart

- Comes with powder-coated black finish
- Approximate weight 14 lbs.
- All welded aluminum construction
- Folds for easy storage
- Axles positioned to keep weight distributed over axles and not on your hands or bicycle
- Wheels detach for mobile transporting
- Folded dimensions: Length 41" x 29"
- 16-inch pneumatic wheels and tires
- 20 inch tires available
- Lifetime warranty on frame
- 400 pound capacity
- ATV and bicycle hitching accessories available
- Bicycle hitch is 100% articulating (will allow full movement, unlike other hitch designs)
- Many other uses such as:
 - › lawn & garden
 - › city transportation
 - › ATV's
 - › on the farm
 - › at the beach

TIMBERTALL

TREESTANDS

Thanks to **TimberTall**, I now have a tree stand that meets all of my standards. If you do have to move for a difficult shot, you can do so because it's stable and quiet. This was my fourth season hunting from my **TimberTall** stand, as well as my fourth buck from this stand.

Thank you again.
Gary Hoffman
McAlisterville, PA

This letter is to commend you on your tree stand. I am impressed with the quietness of the stand as much as anything. I like to hunt most of the day, and the comfort of the seat climber is unsurpassed. I harvested a 150's class buck last season, with one of the biggest reasons being your stand. I like to hunt with decoys. The biggest concern is dragging in a decoy as well as carrying a heavy and cumbersome climber. It is nearly impossible if you have any distance to travel to your stand, not to mention being soaked with sweat once you are there. Your stand is light enough for me to do this. I was able to take my buck over the decoy at 30 yards. Thanks for my biggest whitetail buck to date.

Sincerely,
Jim Lakes, President, Whitetail Management Team

I shot this 135 class, 8 point with my Alpine bow while hunting from my **TimberTall** tree stand! Thanks for a GREAT product!
Galen Kieh

The area in which this buck was taken only had one climbable tree. Although the diameter of that tree reduced drastically within 20 feet, your stand gave me the confidence I needed, knowing I could level the stand safely, without risk of falling or making a lot of noise. Thanks, **TimberTall**, for giving me the opportunity to harvest this 10 point, 115¾ Buckmaster Buck.
Bryon Waltman
Lewis, PA

I've been a loyal customer for 7 years and I'd like to thank you for making a tree stand so comfortable, quiet, and safe. Your **TimberTall** tree stand allowed me to sit for a long period of time and kill this monster 16, non-typical buck in Missouri.
